

Universal Law

John Chang

Abstract: What is the highest law of the universe? It was said that the ".", "1", "o" as a kind of symbol and graphic, represents the highest law of the universe. They seem to be simple, but profound philosophy, if translated into their national language, written in Chinese or "point", "line" and "Circle", which is not a law of the universe, because the language of States changed their graphic and symbol shape, but also are given to different interpretations.

1. Foreword

In the universe, among all mortal things, it appears that there is no law, but the actual was hidden. This universal law exists everywhere, and in the universe and the Earth, all human subjects, such as natural science, philosophy, economics, religion ... that almost all the areas containing such rules, we call the universal law.

2. The so-called law of the universe

Before, a lot of people talked about the law of the universe, many of the rules are trying to solve the law of the universe, especially in those classical religions and philosophical books. Later, science also came to participate in.

Some religious people will be classified rules of the universe as God. They believe that all things are created by God, the master of course, by God.

Some religious and non-religious people conclude these natural rules for the following words: "Benevolence, Righteousness, Morality and Virtue"; "Truthfulness, Benevolence, Beauty and Forbearance"; "God, Buddha, Law and Intelligence". Such as Buddhism is from the word of "Buddha, Intelligence"; Taoism from "Morality, Really" word; Confucianism from "Benefactor, Good"; Christianity, Islam taking "God".....

Modern scientists have another set of ideas that they want to use mathematical theory which united all other theories, and physicists call them grand unified theory. The basic idea is to be found a full reunification in four of the current “strong interaction” and “weak interaction”, electromagnetic and gravitational interaction. As long as reunification, we will be able to find a formula of the law of the universe or the model, although there was no unity of the gravitational theory.

3. Truth of the rules

We know that mathematics is the basis of science language. The most basic mathematics is “.”, called “Point”; the “o” and “l”, called “Circle” and “Line”. We know from elementary school, “o” and “l” is infinity “.” component, composed of many of their mathematical theorems and justice, such as two parallel lines never intersect is an axiom. What is axiom? People are unable to prove that, but had to admit the facts. Earthling can’t prove, but it does not mean that Homo sapiens unable to prove that. In fact, it is this simple “.”, “l”, “o” that constitute the basis of the whole mathematics progress.

Another example is the tree, which is grown from a small seed. Seeds are like a mathematical basis “.”; the outline of tree is as in mathematics “o”; trees from small to large grow continuously, upward and the horizontal expansion is virtually “l”.

Fig. 1 Tree Structure

Animal are the same, animal embryos is “.”; profile and age is the “o” and the length or height is “l”.

Fig. 2 Nucleus ".", "1", "o" structure

They are also mentioned in physics. The material is "."; time is "o" and the space is "1". Major research and foundation of physics is the quality, space, time and energy.

Chemistry is the subject of studying morphology of substances. Material is from the atomic and molecular composition; atom is formed by the atomic nucleus and nuclear external electrons. In nucleus, the different configuration of protons and neutrons and nuclear external electrons are the different chemical elements, but also determines the chemical reactions and properties.

The atomic structure of the atomic nucleus is "."; nuclear external electrons arrangement is the "o" and the electronic energy level transitions is "1".

In literature, novels or most of the article, a main thread runs through all, this is "1"; article chapeau, the central element to an end, is "o"; article focus on the main characters or events is the essence of the article, namely ".". From a point to an area and from a point to a thread, the language teachers is often mentioned, the only way are a good article. Everyone has an inner invisible ".", "1", "o", the same article but a different view, was it good or was it bad, and why? People do not know it.

In religion, Christianity and Islam worship of God or Allah, is a "."; all Buddhist classics is an "o"; Taoist what is a "1".

In today's world, every day the tens of thousands of all types of publishing books and magazines, no matter what subjects, have an invisible ".", "1", "o" in its classification and screening. Most of the newspapers and magazines, 90% become rubbish in a few days or a few months, but like some of the great philosophical or literary masterpiece, even if the millennium still experiencing widely circulated, this book is classic.

The classic books are like seed or tree trunks, most magazines, newspapers are the leaves. Leaves have to replacement every year, but the trunk will not. This is the law of nature, it contain any subject.

Many basic science book is built on mathematical ".","1","o" with its expansion, it is classic; and many books of philosophy and religious study ".","1","o", so it is classical.

4. Rules of the universe

On our return to rule of the universe, the law of the universe should understand by all the wisdom human being of universe as a simple graphics, symbols, theories or language.

Here are given only graphics and symbols, language and theory have to use the language of people on Earth and theoretical explanation, in-depth understanding of these graphics and symbols, you will be able to understand the rules of the universe.

What is the highest law of the universe? It was said that the ".","1","o" as a kind of symbol and graphic, represents the highest law of the universe. They seem to be simple, but profound philosophy, if translated into their national language, written in Chinese or "point", "line" and "Circle", which is not a law of the universe, because the language of States changed their graphic and symbol shape, but also are given to different interpretations.

Therefore, all characters can be exercised for their pronunciation, but not represent their significance.

Fig. 3 The ".","1","o" called the "point", "line" and "circle"

“.” called “points” and represents a real substance and truth, a kind of force and power control center. It is the source of all things, is the only unique and rule status.

“1” called “lines”, represents an exploration, enterprise and competition. It also represents a top-down development process, such as the human society. “Emperor-minister; Father-son”; the celestial body center of the universe, galaxies, stars and planets; science is exploration, science is “1”.

“0” is “round”, represent a hierarchy and orderly, a stable could not go beyond the boundaries.

Most of the current religious stability and stressed that such limits, including their often said that the ethics regulations, and “virtue and morality”. These regulations are “o” without the wall, to break through these regulations and crimes, will be input to “o” with the wall of prison.

If humanity according to these regulations and creed do, the nations of the world, society and the family will be stable and beautiful. But because there is no emphasis on “1”, that is, scientific progress and exploration, we can only practice in the mountains, and wait for death, said the religious tenets of these regulations and the rules do not fully reflect the universal law.

5. Other

Besides talking about the rules of the universe, “.”, “1”, “o” for example, as a supplement, I will give some additional examples.

1) Men and women

Scientists often talk about the difference between men and women, some scientists, spent the energies of a lifetime, made a lot of tests to prove that men and women are of different, these tests including psychological, physiological and behavior. They finally concluded that the man’s behavior first finds expression attack, independence and exploration; woman first finds expression caring, dependent and stability.

In fact, if those scientists understand “o” and “1” meaning, such as from a male and female genitals, we can see the difference between men and women, how much time can be a province.

Men's genitals is "1" shaped, as we said earlier, represent the attacks, competition, independence and exploration; woman's genitals is "o" shape, represent caring, dependent and stability; "." is of course baby in the women' womb, the future of men and women, that is "1" and "o".

This counterparts in mathematics "." go to "o" and "1"; the other hand, "1" and "o" intersection created ".".

Fig. 4 Men and women

In addition, the "1" also on behalf of space, is the length of body; "o" represents time, representative of the life cycle, so the average height of men is higher than women, but have shorter life expectancy than women. Further, a men's sperm is "." and "1"; woman's egg is "." and "o".

Is it God made man or woman to express the universe rules of the ".", "1", "o"!

2) Extraterrestrial civilization

Modern people are interested in flying saucer (UFO), the reason is not understanding why the aircraft of extraterrestrial civilizations are round, a lot of people think this is a high-tech craft, and we have not yet reached.

In fact, the Earth people do not understand "o" is in the universe sense, when you understand the "o" in the law on behalf of the universe "caring and goodwill", would understand the meaning of the extraterrestrial Homo sapiens. Aliens arrive at a new planet, the first consideration is safety, it would be this planet wisdom human attacked. They must be in the aircraft design, the direct expression of this objective to new planet they reach.

For higher than the planet they wisdom, of course, understand the meaning of circular aircraft, and not shooting down when they are close to the planet; for wisdom lower than their planet, do not understand the meaning of circular aircraft will attack them, but technology will not.

The aircraft of the Earth's human are linear, we can see that we do not understand the "1" great significance in the universe. Therefore, these "1" shaped aircraft could only be used for war, attack and exploration, playing own people is sufficient on Earth. Extraterrestrial civilization only look at the design of aircraft on this planet, they will know the level of us. They can not communicate with us, as long as we seize them, and must be addressed to the anatomy of the study.

How can we in the design of aircraft demonstrated understanding of the universal rules we have, and this is the Earth's human wisdom, the more performance, the more wisdom of this planet means.
